

## Context API (native)

- Global State
- Akış abası statik
  - Theme
  - Language
  - Authentication

## - Context (birden fazla)

- Auth Context
  - Theme Context
  - Language Context
- nested

- State sayısının az olduğu ortamlar (useReducer)

## CONTEXT

1. Context (Create)
2. Provider
3. Consume
  - useContext()

## - Reducer (State indirme)

- dispatch(action)
- useReducer()

## Store

- counterReducer.js
  - todoReducer.js
  - index.jsx
- birleştirme cıbc

## (3rd party) MobX, Zustand

## Redux

- Global State Container
- Akış hızlı
- Store (bir tane)

- Basket
- Auth
- Language
- ...

(Combine)  
tek e ki kontrol

- Dev Tool
- debug
- ...

## REDUX

1. Store (create)
2. Provider (Sarmak)
3. Consume
  - useSelector()

## 4. Reducer dispatch()

## Context

- x
- y
- z
- index.jsx

## Service

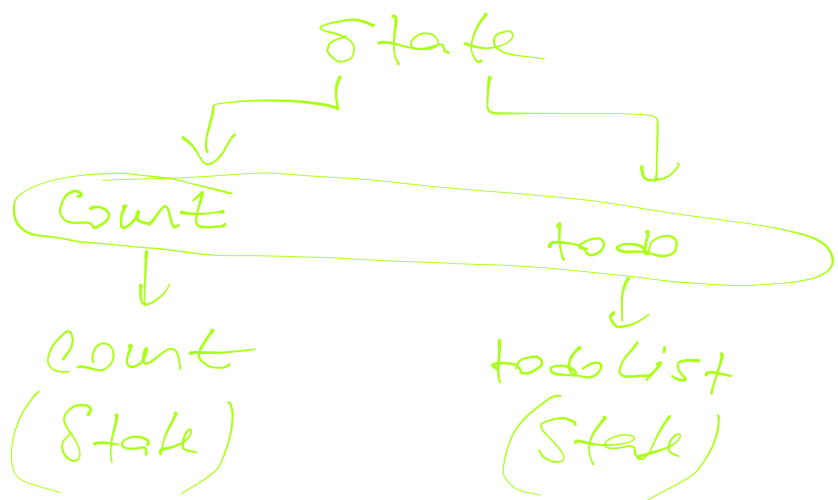

- a
- b
- c
- index.jsx

↓  
import Store from "./store"

"./store/index"

"./store/abc"

state  
↓  
count

state.count.count

state.todo.todoList
